SRC300 System Remote Control

Housed in an attractive silver casing, and giving full access to the functions of the Octopus Multi-Room Entertainment System, the Octopus SRC300 System Remote Control allows the functions of the Octopus WCU300 Wall Control Keypad to be carried out at a distance. The SRC300 provides dedicated buttons for Tuner, CD, DVD, and 3 additional inputs, as well as Local and CCTV inputs, giving instant access with just one button push.

A select button allows access to the menu structure with controls for bass, treble, balance etc. A mute button allows a single zone to be muted at will, and at the end of the day, the "All Off" button shuts down the whole Octopus Multi-Room System.

Features and Benefits

- Stylish and resilient silver casing
- Intuitive key layout
- Full access to all system functions
- Construction tough enough for even the most demanding users
