

Sun-fire sub-woofer

# HRS-8

## 8" High Resolution Series Subwoofer - HRS-8

If your subwoofer puts out less than 1000 Watts, it's not an HRS Series subwoofer. And, all HRS subwoofers produce this prodigious sound in a cabinet no larger than the size of your monitor. If that's still not enough - the amplifier in all three HRS models incorporates Sunfire's unique Tracking Downconverter™ technology. Remarkably, this amp design remains incredibly cool while delivering up to 50% more voltage than our competitor's designs. More voltage means more control of the subwoofer itself. And more control means deeper, more accurate bass, something you'll truly appreciate every time you listen to your favorite music and movies. For medium-sized and multi-purpose rooms, where both music and movies are just what the doctor ordered, there's no better choice than the HRS-8.

### Specification:

Size:	10" cubed
Drive unit:	8" Custom, High Excursion Woofer
Power output:	1000W
Finish:	Piano black or Gloss white

### Product review: [Avhub.com](http://Avhub.com)

This 25cm cube produces seemingly miraculous levels of bass energy from one of the smallest subs we've ever seen. What the...?

#### Possive:

- Incredible bass extension for such a small unit
- High levels available
- Tuneful and tight performance

#### Negative:

- Not suitable with small satellite speakers
- No one will believe the bass it produces!

### Price:

Sunfire HRS8	£749.00
Sunfire HRS10	£995.00
Sunfire HRS12	£1,250.00
